

Measuring gig economy in Poland using mobile big data

Beręsewicz Maciej^{1,2*}, Nikulin Dagmara^{3†},
Szymkowiak Marcin^{1,2‡}, Wilak Kamil^{1,2§}

Acknowledgements

Acknowledgements: Authors would like to thank Marcin Augustyniak, Joanna Tyrowicz, Grzegorz Grygiel and Jakub Sawulski for value comments on early version of this paper. All errors are ours. The views expressed in this paper are those of the authors and not the Statistics Poland nor Statistical Office in Poznań.

Preprint information: This paper is based on the working paper: *The gig economy in Poland: evidence based on mobile big data* available at arxiv <https://arxiv.org/abs/2106.12827>, which has been significantly rewritten.

Funding: The study was conducted as part of the research project *Economics in the face of the New Economy*, financed under the Regional Initiative for Excellence programme of the Minister of Science and Higher Education of Poland, years 2019-2022, grant no. 004/RID/2018/19, financing 3,000,000 PLN (for Maciej Beręsewicz, Marcin Szymkowiak and Kamil Wilak). A validation study used in section 5.2.2 and data from Selectivv used in section 5.2.1 was financed from the National Science Center grant no. 2020/39/B/HS4/00941 (for Maciej Beręsewicz).

Data availability: All data and codes are available at github repository `DepartmentOfStatisticsPUE/rid-measuring-gig`

Contribution: Maciej Beręsewicz contributed in 80%, Dagmara Nikulin contributed in 15% and the remaining authors contributed equally. Material preparation, data collection and analysis were performed by Maciej Beręsewicz. The first draft of the manuscript was written by Maciej Beręsewicz and all authors commented on previous versions of the manuscript. All authors read and approved the final manuscript.
